

**MECHANICAL REPAIR
SERVICES**

Our Green Strategy

Our staff and management are deeply committed to preserving the environment we live in.

In our operations we recycle on a daily basis: batteries, anti-freeze, oil, oil filters, oil containers, plastics, steel, cardboard and much more. In our lunch room, we recycle pop bottles and cans.

In a bigger picture, we are firm believers in promoting to our clients the benefits of preventative maintenance. We believe the best and most efficient allocation of resources is through the constant practice of preventative maintenance.
